Public reporting burden of this collection of information is estimated to average 27 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-1061).

NOTE: Interviewers do not need to read any part of the burden estimate nor provide the OMB number unless asked by the respondent for specific information. If a respondent asks for the length of time of the interview provide the most accurate information based on the version of the questionnaire that will be administered to that respondent. If the interviewer is not sure, provide the average time as indicated in the burden statement. If data collectors have questions concerning the BRFSS OMB process, please contact Carol Pierannunzi at <u>ivk7@cdc.gov</u>.

# **Binge Drinking**

[CATI NOTE: ASK BINGE DRINKING QUESTIONS ON BOTH QUESTIONNAIRE PATHS.]

[CATI NOTE: IF C11.03 >= 1 AND <77, CONTINUE. OTHERWISE, GO TO THE NEXT SECTION.]

Previously, you answered that you drank [5 or more for men, 4 or more for women] alcoholic beverages on at least one occasion in the past 30 days. The next questions are about the most recent occasion when this happened. For these questions, one drink equals 12 ounces of beer, 5 ounces of wine, or one and one-half ounces (one shot) of liquor. So a 40-ounce beer would count as 3 drinks, or a cocktail drink with 2 shots would count as 2 drinks.

# NOTE: If asked, 'occasion' means in a row or within a few hours.
